Good events need a clearer sponsorship ask.

PUTRApitch helps UPM student organisers turn an event idea into reviewable sponsor cards.

Unclear needs

What products, services or quantities are needed?

Unconfirmed benefits

What can the student team actually offer?

Scattered preparation

How can a small business assess a concise request?

CLARIFY
DRAFT
REVIEW

Before any commitment.

WorkBuddy plans and drafts. Students decide.

1 Proposal + goal

Student saves text or imports PDF text locally.

2 WorkBuddy prepares

Manual start: read inputs,
record a plan, ask questions.

3 Student answers

Save answers and keep
unknowns
unconfirmed.

4 WorkBuddy resumes

Reread latest answers;
save source-linked drafts.

5 Review, edit and explicitly publish a limited card

Private inputs stay local. Content review is not approval or sponsor acceptance.

A real saved workflow, not a fabricated run.

First Splash Swimming Clinic

Clearly fictional student-event demonstration

Recorded WorkBuddy actions

Read request -> plan -> prepare -> reread answers
-> save source-linked package continuation.

Supported draft outputs

48 water bottles | loan of 12 kickboards
One coach for 3 hours | student-team thank-you only.

Historical saved activity, not a fresh run today.
No business matching result is claimed.

ACTUAL SAVED WORKBUDDY RECORDS

Historical fictional example | source excerpt, not a new run or chat screenshot

No keys, private records, business match, endorsement or acceptance.

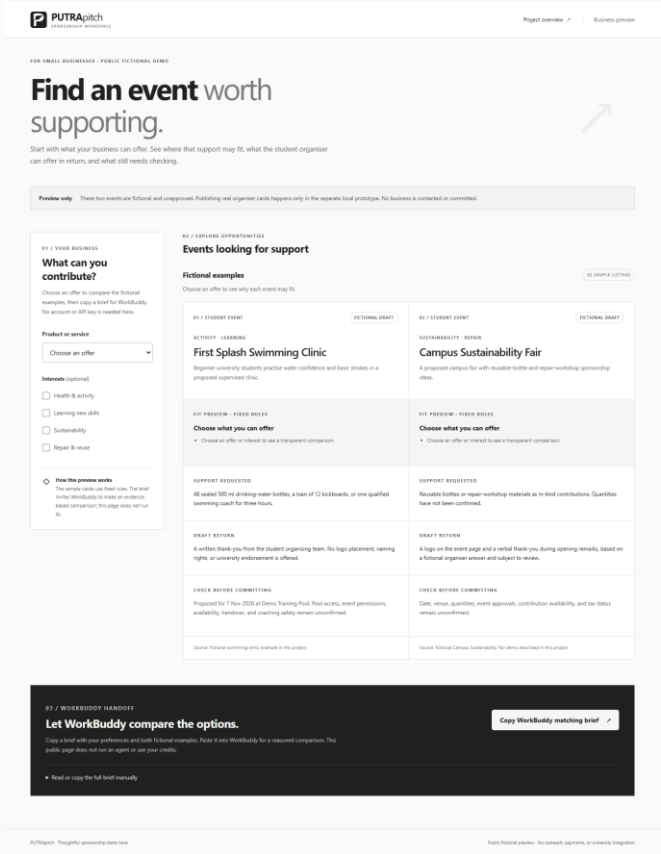

Let a small business see the ask, not private inputs.

Offer + interests -> fixed-rule fit reasons

Public demo contains fictional sample cards.
Its current matching example is rule-based,
not a WorkBuddy business match.

Copy WorkBuddy matching brief

Manual handoff is available. A WorkBuddy
matching result exists only after someone
runs the brief; none is claimed here.

Two views: local preparation, public discovery.

A. LOCAL STUDENT WORKFLOW

Save proposal -> first WorkBuddy run
Answer questions -> explicit resume
Inspect draft sources -> edit/review
Optionally publish a reviewed card

Saved proof: fictional clinic, 3 draft needs.
Separate fair cards came from CodeBuddy CLI.

B. PUBLIC BUSINESS PREVIEW

Open demo -> visit marketplace
Choose an in-kind offer + interests
Inspect fictional rule-based fit reasons
Copy manual WorkBuddy matching brief

Public preview only: no private requests,
no live WorkBuddy run, no accepted sponsor.

A reviewable ask today. Better matching next.

Built: local preparation, answers, source-linked drafts, review + publication.
Public demo: fictional overview + rule-based marketplace preview.

Next: run a WorkBuddy match, personalise pitches, export full campaigns.
No secured sponsors, business contact, payments or university approval.
